

SOCIAL WORK

Study in the field of social work examines social problems from multiple perspectives and encourages change among individuals, families, groups, organizations and communities. Social work practitioners work in child welfare, gerontology, mental and physical health, and community leadership. This program partners with hundreds of agencies to prepare graduates with hands-on field experience.

Programs

- Aging, Minor (<https://catalog.uwm.edu/community-engagement-professions/social-welfare/social-work/aging-minor/>)
