

CIVIL AND ENVIRONMENTAL ENGINEERING

Civil engineering is a profession that deals with the infrastructure of society. Civil engineers design bridges, buildings, and other structures; develop and design water resources, waste treatment, and environmental management facilities; plan and design highway and transportation systems; and design foundations, earth and rock structures, and tunnels. Students completing a civil engineering program have an opportunity for professional employment with industry; utilities; consulting firms; contractors; local, state, and federal government agencies; research laboratories; and academia.

Mission Statement

The mission of the UWM undergraduate Civil Engineering Program is to educate students to become civil engineering professionals who plan,

design, build, and manage the infrastructure needed for a modern urban society and the environment.
